

Djibouti Base Operations Support Services Contract

Project Description

Client:	Naval Facilities Engineering Command
Location:	Republic of Djibouti, Africa and Manda Bay, Kenya
Scope:	Base operation, Logistics
Years Awarded:	2013, 2017
Status:	Ongoing
Value:	\$441M

KBRwyle brings a proven record of performance on this base maintenance project – the largest U.S. contract in Africa.

KBRwyle provides base operations support services at Camp Lemonnier, Djibouti – the largest permanent military base in the Horn of Africa and the primary base for US Africa Command. We support a base population of over thousands of soldiers, sailors, Marines, and airmen, delivering a full-spectrum of base operations and maintenance services, life support, and logistics services. Our operations and maintenance services in Djibouti spans all 24 annexes which the Navy uses for its base operations support service contracts.

KBRwyle originally supported Camp Lemonnier in Djibouti from 2002 through 2007. In 2002, we led the conversion of the former French Foreign Legion outpost into a sustainable U.S. military base. As Camp Lemonnier shifts from an expeditionary to an enduring base, KBRwyle has supported a significant population increase, growth of mission-critical support functions, the addition of 300 new facilities and 1,000 acres of new infrastructure, and the escalation of activities at two forward operating locations: Chabelley Air Field, Djibouti and Manda Bay, Kenya.

Djibouti Base Operations Support Services Contract

Base Operations and Maintenance, Life Support Services, Logistics, and Construction

We serve as a public works department for the site the size of the city of Manvel, Texas, operating diverse and dynamic functions including water and wastewater treatment, power generation and distribution, and waste management. We deploy Maximo to systemize and optimize maintenance and operation of the base facilities and assets.

KBRwyle measures success by the following factors:

1. Maximizing the use of local labor force – “Djibouti First.” As one of Djibouti’s three top employers, Camp Lemonnier allows the local workforce to leverage corporate expertise, knowledge, and industry in support of human resource capacity development.
2. Scalability – KBRwyle has successfully adapted to Camp Lemonnier’s growth. The supported population approaches a 45% increase with impacts reaching every scope. Despite such growth, we maintain the quality of our operations at the highest level, evidenced by recognition from our customer. For the first time in Camp Lemonnier’s history, the Commander, Navy Installations Command awarded the coveted 3-Star

Accreditation for Morale Welfare and Recreation (MWR) services for our outstanding performance and high customer satisfaction.

3. Zero Harm – Our focus on implementing a safety culture in which we make safety-conscious decisions, even in hostile, remote environments is evidenced by achieving over 15 million man-hours without a Lost Time Incident (as of August 2017).

Growth is the largest challenge at Camp Lemonnier. Supported population with a 45% increase with impacts reaching every Performance Work Statement (PWS) element of the contract.

Areas of Support

Operations, Maintenance, & Logistics

- Facilities management and services
- Power generation and distribution
- Ice production and distribution
- Water production, purification, distribution, and storage
- Retail and bulk fuel operations
- Waste management
- Pest management
- Equipment maintenance
- Supply services
- Property book management
- Landscaping and grounds maintenance

Mission Critical Services

- Airfield operations
- Vehicle maintenance
- Fire fighting and fire protection services
- Ordinance
- Unarmed security

Quality of Life Services

- Food preparation and service
- Permanent and transient billeting services
- Laundry services
- Transportation services
- Morale, welfare, and recreational facilities
- Postal Services

Construction

- Life support areas
- Office space
- Master planning
- Construction and engineering services
