

Base Operating Support Services

Isa Air Base, Bahrain

Project Description

Client:	Naval Facilities Engineering Command
Location:	Isa Air Base, Bahrain
Scope:	Base operating support services
Year Awarded:	2013
Status:	Ongoing
Value:	\$115M

Since 2010, KBRwyle has provided base operating support services at Isa Air Base in the Kingdom of Bahrain under two successive task orders under the U.S. Army's Logistics Civil Augmentation Program (LOGCAP) IV. NAVFAC's Isa Air Base BOS contract replaced these task orders. Our delivery of services prior to this contract made us ideally suited to continue our successful performance under the new contract. We completed our transition from the LOGCAP IV contract with no disruption of services to our customers.

Isa Air Base consists of multiple U.S.-exclusive landholdings within the Royal Bahraini Air Force's Sheik Isa Air Base. Each U.S.-exclusive area has its own entry control access points. The base is considered an expeditionary forward operating site and consists of approximately 850 re-locatable/temporary facilities with a plant replacement value of \$315M. The nature of our planning and coordination with the Royal Bahraini Air Force demonstrates our ability to interact and collaborate effectively with any stakeholder group to support a U.S. DoD mission. We routinely interact with stakeholder entities that include host nation coalition forces; host nation government agencies and embassies, and the local U.S. military units who are recipients of the services we provide while they are deployed to a KBRwyle-supported base or training site.

We proposed installing solar street lights on Isa Air Base for energy savings. The 80 street lights provide an annual savings of over \$25,000, and an annual fuel reduction of 1,900 gallons. The simple installation of the lights was completed without disruption to the mission, the environment, or the infrastructure.

Base Operating Support Services, Isa Air Base, Bahrain

On behalf of Isa Air Base, KBRwyle's Galley staff had been awarded the coveted Naval Facility (NAVFAC) 5-Star rating in a recent regional inspection. The award is the culmination of teamwork and dedication by the entire galley crew, including our head chefs, the food preparation staff, and the food service staff. Meals are a critical element that contribute to the overall morale and welfare of military personnel stationed overseas, and KBRwyle is proud of our contributions to make the Paradisa Café an award winning facility.

Areas of Support

Operations, Maintenance, & Logistics

- Facility O&M
- Power distribution systems
- Water purification, storage, and distribution
- Ice production and distribution
- Waste management
- Pest management
- Equipment maintenance
- Landscaping and grounds maintenance

Mission Critical Services

- Tactical vehicle maintenance
- Shuttle bus service
- Material handling equipment

Quality of Life Services

- Food preparation and service
- Billeting services
- Laundry services
- Janitorial services

Maintaining uninterrupted power generation is a mission critical component of our support to Isa Air Base. Owing to extreme summer temperatures, air conditioning demands place a heavy burden on the generators themselves. To ensure a reliable power supply, KBRwyle works collaboratively with the base command to forecast and plan for timely equipment replacement when these components approach the end of their useful life. In addition to supporting the planning effort on base, we also maintain an active repair and replacement plan with multiple redundant back-up generators on hand to rapidly mitigate equipment failure.
