

A Day in the Life of KBRwyle Government Services

KBRwyle employees deliver mission-critical services around the world and in outer space 24/7, 365 days a year.

05:45 At Camp Lemonnier in Djibouti, a KBRwyle air operations manager is reviewing the day's military aircraft arrivals and departures. He and his team will be responsible for the safe handling of all aircraft, cargo and passengers.

07:35 On a ship in the Indian Ocean, a KBRwyle employee is completing maintenance on a piece of military equipment and ensuring it is combat-ready. It is one of hundreds of thousands of offshore Army stock items we maintain for rapid deployment.

08:25 Inside the KBRwyle Security Lab in Charleston, South Carolina, our cyber and physical security engineers are testing the latest batch of electronic devices for vulnerabilities.

09:15 In Lexington Park, Maryland, KBRwyle experts are providing systems engineering and software development support to the U.S. Navy to help analyze aircraft and weapon system performance.

10:05 KBRwyle biomedical engineer flight controllers communicate information to crew members aboard the International Space Station (ISS) to facilitate their periodic health assessment.

11:15 KBRwyle modeling and simulation experts in Colorado Springs, Colorado and Huntsville, Alabama are providing the Missile Defense Agency with testing, certification, wargame and exercise support.

12:25 A KBRwyle instructor at the U.S. Air Force Test Pilot School, Edwards Air Force Base, California is beginning her afternoon training young pilots in the T-38 aircraft.

13:15 At the U.S. Air Force Research Lab in Dayton, Ohio, KBRwyle employees are conducting human performance research on a 5th Generation Aircraft Helmet Mounted Display System (HMDS).

14:35 In Kosovo, KBRwyle firefighters are responding to a structural fire on the outskirts of their military base. Over 270 KBRwyle firefighters and EMTs worldwide protect people, property and the environment during fires, medical situations and other emergencies.

15:15 Northeast of the Kwajalein Atoll, ballistic and cruise missile targets are being detected, tracked and engaged in a flight test supported by KBRwyle engineers as part of our work on the Patriot missile program.

16:44 At NASA's Goddard Space Flight Center, KBRwyle's Aqua Earth Observing Satellite flight operations team is uplinking commands to maneuver the satellite to avoid a collision with orbital debris.

18:52 At a military camp in the Middle East, KBRwyle employees are serving the evening meal to tired U.S. soldiers. We have been providing a home away from home for deployed military troops since WWII.

20:22 After another day of delivering safe and reliable mission-critical services, the momentum shifts to preparing for tomorrow.
