

Logistics Civil Augmentation Program IV - CENTCOM

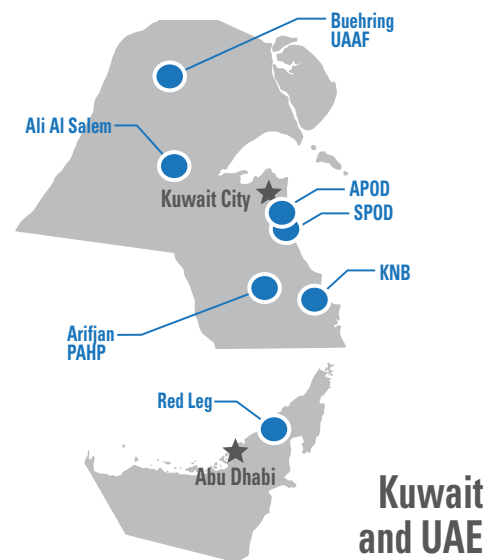

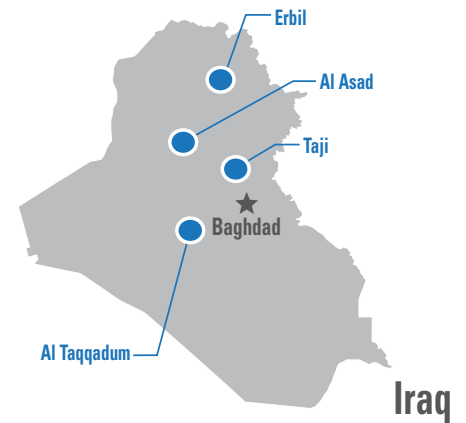

Project Description

Client:	U.S. Army Material Command
Location:	UAE, Iraq, Kuwait
Scope:	Base operating support services, logistics, and construction
Year Awarded:	2014
Status:	Ongoing
Value:	\$500M

KBRwyle has been an active, trusted participant in the Logistics Civil Augmentation Program (LOGCAP) since 1992. This Department of the Army program is specifically designed to enable rapid-response contingency support services anywhere in the world. As the U.S. Army's primary method to obtain on-call contractor support for time-sensitive mission activity, the criticality of this contract vehicle cannot be overstated. From Operation Restore Hope in Somalia in 1992 to Operation Inherent Resolve, underway since 2014 in Iraq, KBR has delivered services under the LOGCAP program. KBRwyle is embedded with our client and able to flexibly deliver services as quickly as the geopolitical needs of the U.S. Army shift.

KBRwyle's continued, successful execution of this program stems from our focus on delivering client objectives including *responsiveness, transparency, predictability, capability, affordability and flexibility*. We understand and adapt to the complexities of operating in remote, austere and hostile environments that demand complex solutions to staffing, supply chain, and the shifting populations served across 15 mission locations. We adapt and deliver solutions to geometric growth with zero-notice OPTEMPO changes, while maximizing use of local national work forces.

Logistics Civil Augmentation Program (LOGCAP) - CENTCOM

We constructed and manage a \$2.6M, 22k sq. ft. dining facility in Erbil serving an average of 59,000 meals each month.

KBRwyle continues to provide support to the U.S. Army combatant commands during contingency operations for Operation Inherent Resolve at six sites in Iraq and nine sites across Kuwait and the UAE. Support includes base operation and maintenance, and general construction services spanning 80 services requirements, supporting a population over 8,000 on a 24/7 basis.

In Iraq, KBRwyle achieved 2 million work hours without a Recordable Injury (as of July 2017) – a remarkable achievement while performing services in a remote and hostile environment.

Areas of Support

Operations, Maintenance, & Logistics

- Facilities and systems O&M
- Camp operations
- Power generation and distribution
- Ice production and distribution
- Water production, distribution, and storage
- Retail and bulk fuel operations
- Fire fighting and fire protection
- Waste management
- Pest management
- Tactical and non-tactical equipment maintenance
- Property management
- Landscaping and grounds maintenance
- Theater transportation mission

Quality of Life Services

- Food preparation and service
- Billeting services
- Laundry services
- Morale, welfare, and recreational facilities
- Postal services

Construction

- Master planning
- Cost estimating
- Construction inspection
- Scheduling
- Procurement/Acquisition
- Commissioning
- Quality
- Safety
