

Prepositioned Stock and Depot Maintenance

Total logistics solutions for complex environments

Global Response

Expeditionary logistics focuses on supporting the military in pre-positioned stock logistics needs. Our innovative combination of customer-centric total quality and Six Sigma methodologies blends program management, sophisticated systems engineering, integration, and depot maintenance, enabling us to develop and build close working relationships with our customers and lasting solutions that enhance efficiency and performance and help control costs.

Program Management

Interfacing, integrating, coordinating and driving down cost while at the same time enhancing operational availability is the management task customers routinely entrust to KBRwyle. We deliver the best solutions to our customers through our biggest asset – our people. We believe that honest and ethical behavior is imperative to successful operations and future growth.

Depot Maintenance

KBRwyle provides responsive, cost-effective depot support, customized to the customer's operation and mission. We saved millions of dollars for our customers through our successful management of on-site and off-site, centralized and decentralized repair facilities. Our capability in providing depot level support to geographically dispersed facilities while maintaining high levels of system availability is well recognized throughout the industry.

Prepositioned Stock and Depot Maintenance

KBRwyle is a diverse professional and technical services leader. We offer quality-based competencies in program management, defense logistics solutions, engineering and development services, and quality assurance.

On the TACOM Life Cycle Management Command Strategic Support Solutions (TS3) Multiple Award IDIQ Contract, we implemented a centralized TS3 IDIQ center of excellence to support our customer's needs and meet all current and anticipated mission requirements.

Continuous improvement through rapid problem solving

On P&MCLS, KBRwyle realized a

- Significant reduction to excess government inventory.
- Significant space gain due to reduced inventory
- Received the Marine Corps Achievement in Safety Award (Group IV) for 2012 and 2013

On Army Pre-positioned Stocks, KBRwyle

- Eliminated non-value-added maintenance time by 1,047 hours
- Reduced vehicle movement by 725 miles
- Gained significant space due to government inventory excess reduction

Positioning and Marine Corps Logistics Services

Under the Prepositioning and Marine Corps Logistics Services (P&MCLS) contract, KBRwyle's employees maintain and repair 50% of all the U.S. Marine Corps ground combat assets – military vehicles, equipment, and material at Blount Island Command, Jacksonville, Florida. The services include supply chain, kitting, shipboard, and in-theater support.

Army Prepositioned Stocks

Similar to the P&MCLS contract, KBRwyle maintains and repairs U.S. Army ground combat assets. As part of a significant baseline and future state formulation effort, the program engaged in an extensive value stream transformation effort of maintenance and logistics operations that reduced excess government inventory.
