We Deliver

Tactical Missiles

Supporting the U.S. Army PEO Missiles and Space Mission

Supporting a Decisive Battlefield Advantage

For over 20 years, KBRwyle has helped the U.S. Army execute its mission to develop, field and sustain missile and space systems that provide a decisive battlefield advantage. We embrace a “Warfighter First” focus and are committed to enabling Program Executive Office Missiles and Space (PEO MS) mission success. The PEO MS project offices we have continuously supported for over two decades include:

- Close Combat Weapon Systems (CCWS)
- Joint Attack Munition Systems (JAMS)
- Precision Fires Rocket & Missile Systems (PFRMS)

Capabilities

Systems Engineering

- Integrated product teams
- Prototype evaluation
- Advanced electro-optical sensors development and integration

Product Assurance

- Product quality management
- Defect prevention program monitoring

Testing Support

- Test development and analysis
- First Article testing
- Technical testing

Configuration Management

- Physical configuration audits
- Functional configuration audits
- Technical Data Package (TDP) development and analysis

Foreign Military Sales (FMS)

- System repair and refurbishment
- FMS return and repair program support
- FMS case system production and delivery support

Reliability, Maintainability, Quality, Supportability, and Interoperability (RMQSI) and Logistics

- Acquisition planning and management analysis
- Logistics management
- System fielding
- Operator and maintenance training
- Urgent and full material releases

Sustainment Management

- Service life extension program support (SLEP)
- Maintenance concept analysis

Program Lifecycle Support

- Cost analysis
- Program milestone development

KBRwyle Advantages

- 20+ years supporting CCWS, PFRMS and JAMS project offices
- 35+ years supporting U.S. Army Air and Missile Defense
- **Institutional Expertise:** Possesses cradle-to-grave institutional knowledge of tactical missile systems lifecycle
- **Trusted:** Known for accurate, detailed Total Package Fielding support, contracts support, budgeting and logistics sustainment support
- **Warfighter Focused:** “Warfighter First” attitude ensures our services effectively contribute to PEO MS mission success
- **Quality Focused:** Maintains rigorous, proven systems engineering procedures and processes
- **Highly Skilled:** Invests in our workforce with industry-recognized certification programs (i.e. INCOSE, PMP) and training
- **Easily Accessible:** Available through a wide variety of contract vehicles including DS TAT, AMCOM EXPRESS and OASIS

Trusted Tactical Missile Support Services

KBRwyle offers unique benefits given the cradle-to-grave systems lifecycle institutional knowledge we have amassed over 20 years. Our expertise includes system engineering; product assurance; testing; configuration management; Foreign Military Sales (FMS); logistics; sustainment; program lifecycle support; and Reliability, Maintainability, Quality, Supportability, and Interoperability (RMQSI).

Key Services

- Program/Acquisition Management
- Lifecycle Sustainment
- Systems Engineering
- Test Development and Analysis
- Operator Training
- FMS and International Program Support

Examples of KBRwyle Work

- Refurbished over 300 tube-launched, optically tracked, wire-guided (TOW) M220 systems for delivery in support of customer's FMS case
- Performed engineering and integration analysis of 3rd GEN forward looking infrared (FLIR) into the Bradley Fighting Vehicle System
- Fielded over 1,500 TOW improved target acquisition systems (ITAS) and trained over 19,000 soldiers on system operation and field level maintenance
- Supported a Vehicle Operational Life Extension Program (VOLEP) on 300 +multiple launch rocket system (MLRS) and high mobility artillery rocket system (HIMARS) vehicles
- Provided program management support of 60 HIMARS returned from theater for reset maintenance
- Provided new equipment training for Long Range Communication, Blue Force Tracker, and Driver Enhancement Viewer system upgrades to fleet of MLRS and HIMARS users
- Conducted annual resets on over 375 Hellfire missile launchers and support test equipment
- Supported 25 FMS partners with more than 80 Hellfire and Hydra-70 FMS cases valued at more than \$1.5 billion
- Conducted supplier surveys and audits to ensure adherence to satisfactory manufacturing techniques
- Completed eight Full and Urgent Material Software Releases for Hellfire, Hydra-70 and APKWS weapon systems. Currently completing 15 Material and Software Releases.

Systems Supported

- AGM-114 Hellfire
- APKWS
- HIMARS
- Hydra-70 Rocket
- Javelin
- Joint Air-to-Ground Missile (JAGM)
- MLRS
- TOW Bradley
- TOW ITAS
- TOW M220

About KBRwyle

KBRwyle is the global government services business of KBR, Inc. (NYSE: KBR). KBRwyle delivers full life cycle professional and technical services from over 60 U.S. and 40 international locations. The company is trusted to lead many of the world's largest and most critical government programs. KBRwyle's core capabilities include logistics, engineering, operations, science, program and acquisition management, IT, cyber and security services.
